CARPET CLEANER

Encap Rinse

Dry Foam Encapsulating Carpet Rinse

CORE 3

Core 3: Personal Attention

Every customer requires special attention and has their own demands put on them. Our staff will design and implement a program designed to fit your needs.

Core 3: Experience

With our full staff of formulators, chemists, & marketing professionals we have been bringing cutting edge products to market for over 70 years.

Core 3: Technology

Through daily contact with industry professionals, we are continuously updating and improving our products to make sure you perform at your best.

Synthetic Labs offers industry-leading solutions for businesses and professionals who demand exceptional results.

CARPET CARE

EncapRinse

Dry Foam Encapsulating Carpet Rinse

What Is Encap Rinse?

Encap Rinse attacks all soils found in carpeting. Its unique formula emulsifies them, and then using the latest technology, encapsulates the soil for easy removal. Because the soil is encapsulated, whatever does not come out during extraction, will come out during vacuuming. It can even eliminate the need for re-shampooing when wicking occurs in heavily soiled carpets. Encap Rinse will not remove the stain resistant properties manufactured into the carpet and will actually replenish them. As a bonus, this product eliminates the need for a defoamer, even on carpeting with residue from previous cleaning. Our Encap carpet care products do not contain any optical brightener. Most carpet manufacturers object to their use because they can distort the carpet color even after one use. Encap products are also formulated in a pH range so they will meet all carpet manufacturers recommendations for "Wet Side" cleaning.

Benefits:

- Provides a unique polymer / detergent system for outstanding carpet cleaning.
- Encapsulates oil and soils and other foreign matter commonly found in carpets.
- Dries to a brittle residue allowing for additional soil removal with dry vacuuming.
- Repels soils and stains .
- Soils continue to be removed several days after shampooing with routine vacuuming.
- Complies with carpet manufacturers guidelines for "Wet Side" cleaning.

Directions For Truck Mount Use:

1. Carpet Preparation: Pre-vacuum the area to remove loose dirt and debris. Pre-treat any stubborn stains or high-traffic areas for better results.
2. Adjust the water pressure and detergent flow based on the carpet type and level of soiling.
3. Add 32 oz of Encap Rinse to 5 gallons of water. Set chemical flow meter to 2 gallons per hour. The flow meter can be increased slightly if more chemical is desired.
4. Effective Technique: Use overlapping passes to ensure thorough cleaning without missing any spots.
5. Use air movers or fans to speed up the drying process after cleaning. Advise clients to avoid walking on the carpets until they are completely dry to prevent re-soiling.

For Portable Machines Dilute

- Light Soil: 6 ounces per gallon
- Medium Soil: 8 ounces per gallon
- Heavy Soil: 10 ounces per gallon.

Tech Specs:

Color.....Clear
 Fragrance.....Fresh
 Form.....Liquid
 Phosphates.....None
 FlashPoint.....212F
 pH.....10
 Specific Gravity.....1.02
 Viscosity.....Thin
 Foam.....Moderate
 Biodegradable.....100%
 Shelf Life.....1 Year

Available Packages	
1373-275	275 Gallon Tote
1373-55	55 Gallon Plastic Drum
1373-30	30 Gallon Plastic Drum
1373-15	15 Gallon Plastic Drum
1373-5.25	2x2.5 Gallon Jugs
1373-5	5 Gallon Plastic Pail
1373-4	4 Gallon Case
1373-2L	4x2 Liter EZ Fill
